SUBJECT INDEX

In order to expedite the publication of this subject index, machine procedures have been employed that do not permit the formation, except rarely, of sub-subheadings nor the alphabetization of subheadings beyond the first word.

An asterisk (*) following the code for an abstract indicates that there are two adjacent abstracts bearing the same code.

The auxiliary letters (i.e., the code used for classification of abstracts, given in the Table of Contents in the text issues) following the index entries and preceding the code(s) are given to help the reader identify more easily the subject matter of an abstract. For example, the letters "HD" (see Table of Contents) preceding a code conveys to the reader that the article abstracted is concerned with the area of "Intelligence & Creativity."

CUMULATED AUTHOR INDEX

to the

PSYCHOLOGICAL INDEX 1894-1935

and

PSYCHOLOGICAL ABSTRACTS 1927-1958

This *Index* is a compendious bibliography of books, monographs and articles on psychological and cognate topics that have appeared during the 65 years covered. It has been prepared and maintained in the Psychology Library at Columbia University by clipping the author entries from the two bibliographical periodicals, mounting them on cards, and filing them into one alphabet. The writings of almost every psychologist during this period are now easily accessible. 320,000 cards. 5 volumes.

PSYCHOLOGICAL TEST SPECIALISTS

Exclusive publishers and distributors of selected psychological tests

Quick Test (QT)

A very quick and satisfactorily reliable screening test of intellectual ability (4 to 6 minutes total time for all three forms). Words are defined non-verbally by choice among drawings. Suitable for any person (no matter how physically disabled) who can signal a yes-no response in any way. Covers intelligence levels from two years to superior adult. Excellent for building rapport, and for quick testing before and after any procedure. **$8.00 for set of materials**

Memory-For-Designs Test (MFD)

Simple drawing test of perceptual-motor coordination, serving as extremely sensitive detector of brain injury of many types. **$8.50 for set of materials**

Group Personality Projective Test (GPPT)

Multiple-choice questions about ambiguous stick-figures make possible rapid and effective measurement of significant, factor-analytically isolated aspects of personality. **$13.50 for set of materials**

Id-Ego-Superego Test (IES)

Subtests give independent estimates of personality components from a modified psychoanalytic point of view. **$28.50 for set of materials**

Kahn Test of Symbol Arrangement (KTSA)

Uses symbolic plastic objects which are arranged and sorted; validly discriminates among normals, neurotics, brain-injured, and psychotics, and indicates accompanying personality dynamics. **$25.00 for set of materials**

Full-Range Picture Vocabulary Test (FRPV)

Brief test of intelligence in two forms using the same 16 plates. Words are defined by choosing pictures. Valuable for intelligence screening, and with the physically handicapped. **$7.50 for set of materials**

Geist Picture Interest Inventory (GPII)

Provides for more valid expression of interests by choices among alternative pictured activities. Both qualitative and quantitative interpretations are possible. **$6.00 for set of materials**

Proverbs Test (PT)

Group and individual forms determine similarity of thought processes to those of various normal and clinical groups. Highly sensitive indicator of psychotic processes. **$4.50 for kit**

Vocational Apperception Test: Advanced Form (VAT:ADV)

Separate series of plates showing male and female college-related occupational activities, accompanied by explanation of use and interpretation as a projective test. **$7.25 for set of materials**

Famous Sayings (FS)

Agreement with proverbs, aphorisms, and folk sayings is analyzed to determine personality structure. Particularly useful in personnel selection. **$4.50 for kit**

It Scale For Children (ITSC)

An experimental picture scale for measuring sex role preference in children. **$15.00 for set of materials**

Kahn Intelligence Tests: Experimental Form (KIT:EXP)

Relatively culture-free intelligence tests requiring no reading or writing. Supplementary scales for assessment of intelligence of blind, ability in concept formation, recall, and motor coordination. One scale can be administered by sign language. **$26.00 for set of materials**
